It is absolutely absurd that the NAB would file a petition such as this. Nobody owns traffic and weather reports. It is a great service that XM is providing to its paying customers. They are providing us with information that our local radio stations will not give us. They are just trying to make trouble for a wonderful company because they provide a greater service than the NAB company's do. I respectfully urge you all in Washington to see this petition as petty and throw out the claim from the NAB

Thank you for your time.

Eric Hurlbut
